- Hindi

PROFILE

Innovative and versatile Freelance Engineer with a proven track record of building intelligent, end-to-end connected systems. Specialising in bridging the gap between hardware and software, I deliver complete solutions from Embedded Systems and IoT architecture to AI/ML integration and Robotics (ROS2). Backed by strong capabilities in Flutter mobile development, responsive Web Design, and robust DevOps pipelines, I help clients transform complex technical concepts into scalable, market-ready products.

WORK EXPERIENCE

STEMROBO Technologies

2026 - PRESENT

STEM Innovation Engineer

- Develop and execute cross-disciplinary engineering prototypes and working models that integrate embedded systems, robotics (ROS2), and AI/ML technologies to validate new product concepts.
- Research and evaluate emerging technology trends and methodologies to solve complex technical problems and optimize existing system architectures.
- Transition and scale successful prototypes into production-ready systems by building robust DevOps pipelines that ensure reliable real-world deployment.

EDUCATION

Bachelor of Technology

2022 - 2026

Robotics & AI | Brainware University

CGPA: 8.96 / 10.0

Higher Secondary

2020 - 2022

Vidyasagar Vidyapith, Midnapore | WBCHSE

PERCENTAGE: 82
